OPERATING TABLE ACCESSORIES

New generation, LED Technology

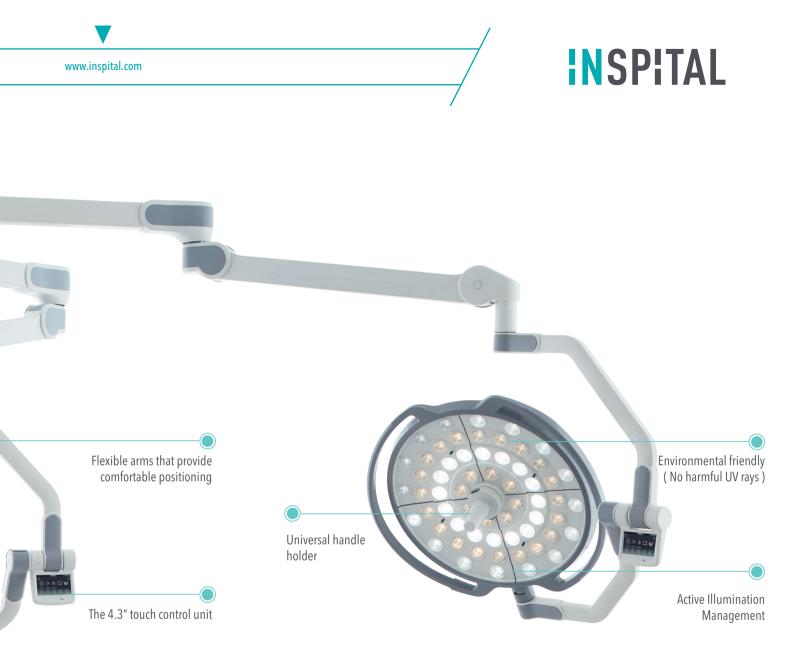

Full HD Surgical Camera

 Surgical videos taken by Full HD cameras provide clear images taken from the operator's point of view, allowing vital intraoperative findings to be clearly illustrated and comprehensively explained

New Generation LED Technology

 Warm /cold white LEDs combined with unique high-tech lenses provide brilliant, homogenous light. Each LED module can be replaced individually in case of any failure

Special Lamp Head Design

 The special slim elliptic head design allows unobstructed flow of clean air through the light head to dissipate accumulated heat and surgical smoke. Degree of turbulence is lower than 29 % at surgical field.

Adjustable Light Field Diameter

 Innovative beam design offers you an extremely wide range of adjustable light field size from 130 mm to 360 mm. The light patch can be easily matched to the wound size.

OPERATING LIGHTS & OPERATING TABLES

Endo Light Mode / StandBy Mode

- Lamp can be switched to the endolight mode by a single button.
- Stylish blue LED strips in stand by mode

Boost Function

 In case of an unpredictable high illumination need, light intensity can be adjusted to 100% maximum level by a single touch

• 3000 K

♦ 5000 K

Wide Range of Adjustable Color Temperature

• The color temperature can be perfectly adjusted between 3000 K to 5000 K by 250 K steps according to the specific operations

NSPITAL

Touch Screen Pro Control Unit

 Inspital Unique tablet application allows to control all functions via wider Touch Screen Pro Control Unit. Optional tablet can be used as a wall control unit with its wall stand.

Medical Monitor

 Watch as you record with wide range of medical grade LED monitors from 19" to 55" sizes

Laser Positioning

 The laser guide is available to easily position the head at the right distance and place for efficient surgeries.

Automatic Distance Management (ADM)

- ADM system measures the distance between patient and light head automatically between 90-110cm and ensure that the surgical site always appears in the best light, literally.

Active Illumination Management (AIM)

 Inspital LED light technology provides the best illumination, even when surgeons are blocking the LEDs. The loss of illumination when certain LEDs are obstructed is automatically compensated by the AIM system.

Illumination Stability Function

The ISF system prevents the intensity of the LED technology from falling, and maintains constant lighting levels by applying an automatic compensation. Guarantee optimum operating conditions in all circumstances.

Battery back up system provides 2,5 hours of energy

OPERATING LIGHTS

INSPITAL LED operating lights are designed to meet all surgical illumination requirements of operating theatres. New generation LED technology helps the surgeons to operate and view the surgery area clearly. INSPITAL LED lights can be adapted in any size of operating theatres including large hybrid types with variety of models & combinations.
