Bronchoscope Endoscope Cabinet

- Made of stainless steel
- Designed to keep the flexible endoscope systems safely
- 5 pcs rail system for easy endoscope hanging
- Inner tray for water collecting
- Glass door with lock
- Adjustable rubber feet

Article Codes	L (mm)	W (mm)	H (mm)
DP10.50	665	471	2215

Cap, Bonnet and Mask Cabinet

- Made of stainless steel
- Designed to use at the entrance of operating rooms and ICU's
- Separate divisions for clean caps, bonnets, masks etc
- Cabinet for used items
- Adjustable rubber feet

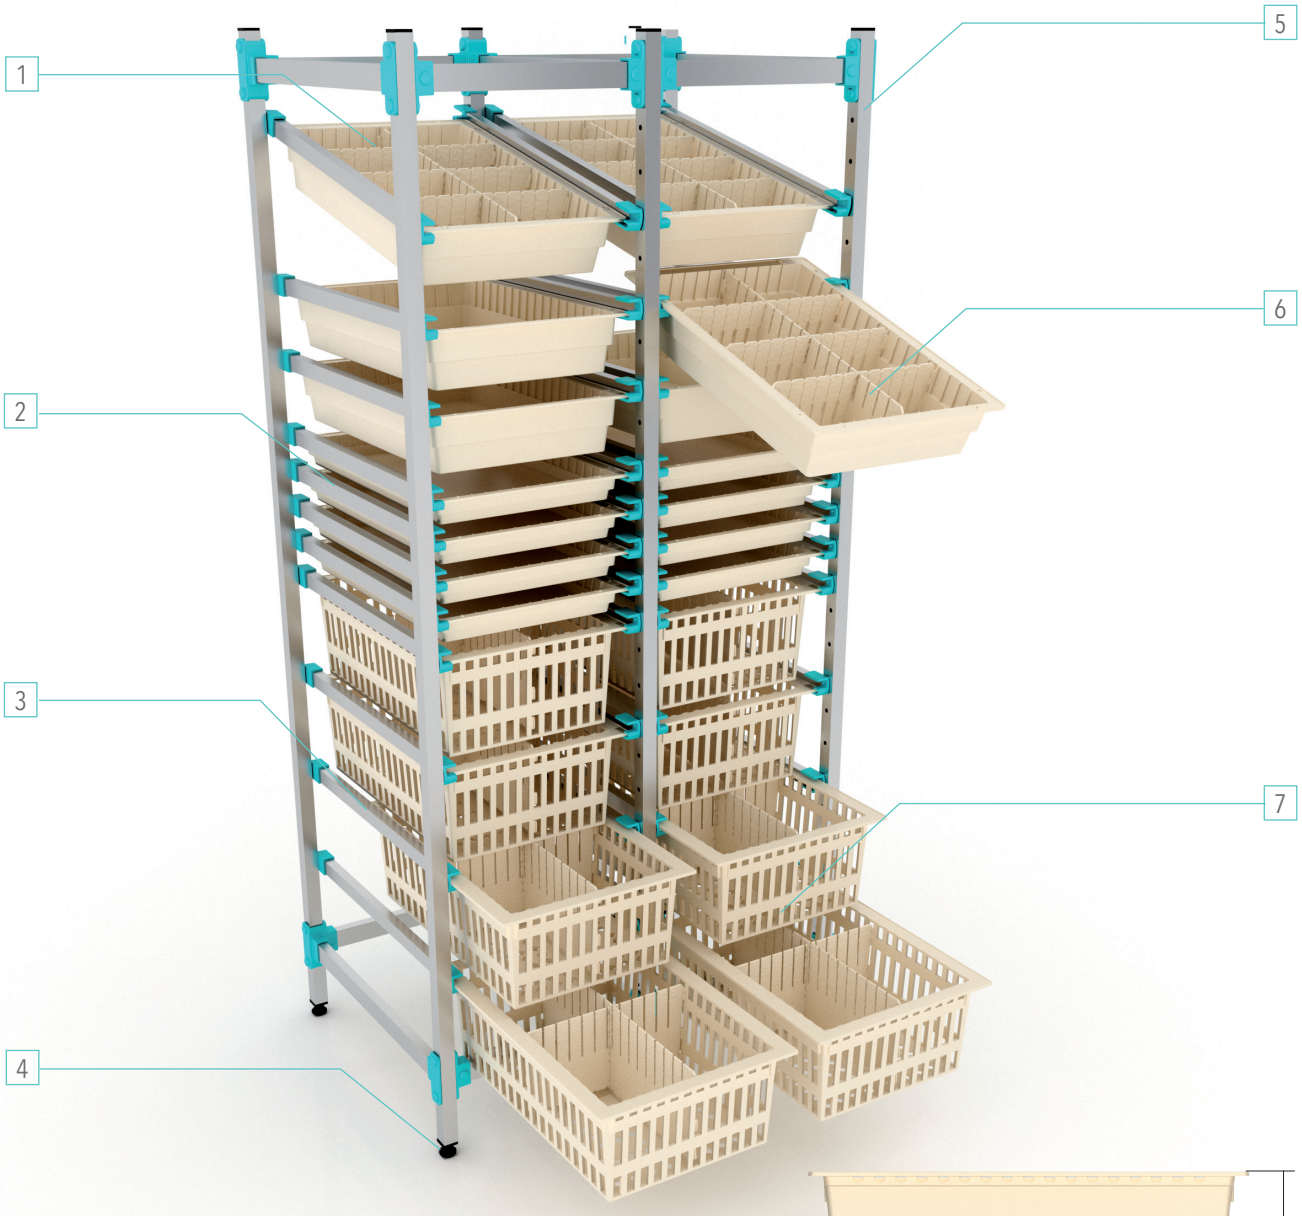
Shelving Systems



- High density storage
- Adjustable tray rails
- Expandable durable aluminum frame
- Horizontal and angled tray positioning
- Long edge or short edge models are available

3 size options for trays & baskets (50, 100 and 200 mm)

1) Modular separators and dividers 2) Easy to position tray holders 3) Easy to clean body 4) Adjustable rubber feet
5) Durable aluminum frame 6) Adjustable tray angles 7) Easy movement of trays and baskets

Shelving Systems

Shelving Systems can be configured to fulfill user need. There are multiple size and type options as well as long edge and short edge orientation alternatives

ABS Modules and Abs Modular Baskets, 600 × 400 mm

- Made of ABS, cream color
- Modular baskets and structures can be stacked and stored
- Sealed base for protection; leaks, dust, particles
- Optional perforated base for special needs
- Easy mounting for label holders
- Easy dividing with separators if needed
- Designed with safety stop system for telescopic rails
- External dimensions are designed to meet healthcare industry standards

PC Modules, PC Modular Baskets and PC Dividers, 600 × 400 mm

- Made of PC, transparent
- Modular baskets and structures can be stacked and stored
- Sealed base for protection; leaks, dust, particles
- Optional perforated base for special needs
- Easy mounting for label holders
- Easy dividing with separators if needed
- Designed with safety stop system for telescopic rails
- External dimensions are designed to meet healthcare industry standards

Storage and Retrieval Trolleys

Storage Trolley and Retrieval Trolley are designed for hygienic storage of laundry, treatment equipment, consumables, durable equipment and transport to different units within the clinic when required.

1) Designed for modular baskets in various height and depth
2) 4 castors structure for maximum mobility, includes a brake system
3) Standard material is plastic coated steel
4) Designed for hanging rails for adjustable angle
5) Easy cleaning

- Shelving Systems provides 30% to 45% more efficient space in storage area
- Finding the correct supplies in Inspital Shelving Systems is much easier compared with classical bulk storage
- Clear line of sight enables users to reach correct supply in shorter time
- Fully retractable baskets and trays enables easy access to desired supply with less effort
- Shelving Systems can be easily extended by adding extension frames according to storage room architecture

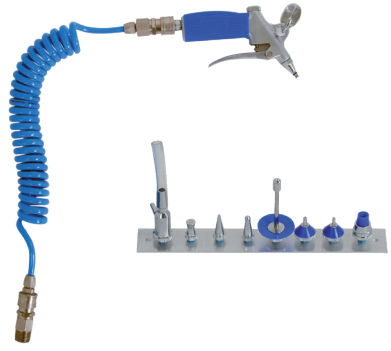
Single Basket & Ultrasonic Washing Technology

- Effective cleaning by ultrasonic wave technology preventing deformation of micro instruments used during operation
- Wire basket with handle facilitating rinse of disinfectants on surgery instruments with its filtering function

Air/Water Gun System

- Compressed air/water gun positioned at both sinks, enabling safe decontamination in lumen instruments used during operation



Ultrasonic Cleaning Unit

- Made of stainless steel
- 12 L capacity, table top system
- 200 W powerful ultrasonic system
- 500 W heating power
- Digital ultrasonic timer (0-100 min)
- Digitally controlled powerful heating system (max 100^{0} C)
- Basket size: 260x200x160 mm

Falcate Table

- Made of stainless steel for operating and intervention rooms
- 2 shelves in shape of falcate
- Upper tray with barrier
- 6 pcs castors 3 of them with brake

Article Codes	L (mm)	W (mm)	H (mm)
AB00.40	1700	450	1000

Mayo Table - Hydraulic

- Made of stainless steel
- Desgined concave corners for easy to clean
- Rotating top tray
- Hydraulic controlled by the foot pedal
- 3 pcs 75 mm castors 2 with brake

Article Codes	L (mm)	W (mm)	H (mm)	Explanation
MS10.51	540	740	740-1130	Hydraulic

Mayo Table - Mechanical

- Made of stainless steel
- Designed concave corners for easy to clean
- Rotating top tray
- Mechanically controlled by hand
- 3 pcs 75 mm castors 2 with brake

Article Codes	L (mm)	W (mm)	H (mm)	Explanation
MS10.50	540	740	970-1410	Mechanic

Paper Trolley

- Made of stainless steel
- Designed to transportation and storage for fabrics and papers
- 4 pcs 80 mm castors 2 of them with brake

Article Codes	L (mm)	W (mm)	H (mm)
AB90.91	1100	500	1000

AB50.55

Open Trolley

- Mainframe is made of stainless steel
- 2 options with fixed stainless steel top shelf and 4 adjustable ABS trays or 5 adjustable ABS trays without fixed top shelf
- 4 pcs 75 mm castors 2 with brake

Article Codes	L (mm)	W (mm)	H (mm)

Inductive work time counter

Purified air

UV-C flow chamber

Contaminated air

UV-C Flow Germicidal Lamps

System disinfects the air by the UV germicidal lamp located in the disinfection chamber. It takes the contaminated air on one side and gives the purified air on other side. Models with external UV lamp provides a wider range of effective area.

Types of housing:

- Stainless steel (INOX)
- Coated aluminium sheet
- Coated carbon steel sheet
- Any RAL color available on request
- Custom mounting elements available on request

Mounting options:

Supply Voltage	:230 V, 50 Hz
Power consumption	:115 W
Lamp Type	:2x55 W / 2x30 W
Useful lifetime of the bulb	:Min 8000 h
Lamp weight type	:8,5 Kg
Cover type	:IP 20
Made of stainless steel	

Article Codes	L (mm)	W (mm)	H (mm)	Explanation
LP20.55	1112	135	210	55 W
LP20.30	1112	135	210	30 W
LP40.55	1112	135	210	Ext. UV Lamp, 55 W
LP40.30	1112	135	210	Ext. UV Lamp, 30 W

Disinfection of the air by means of UV-C radiation in the flow germicidal lamps is carried out inside a disinfection chamber. Contaminated air is drawn by a fan – through a filter catching dust and other contaminations-into the disinfection chamber. The UV-C tube intensity and a time during which air remains in the disinfection chamber are selected so that air blown out from the lamp is practically free of microorganisms. Velocity of air flow through the disinfection chamber is therefore selected as a compromise between a desire to disinfect the greatest volume of air per time unit and germicidal effectiveness. It should also be noted that the forced flow of air results in a smooth circulation of air in the room and thus disinfection of air in the whole room.

Morgue Unit

- Double drawers
- Side way loading
- Made of stainless steel

Temperature Scale	:-5/+10°C
Operation Temperature	: +2/+4°C
Power	: 800-1600 W
Illumination	: 36 W floresan
Defrost	: Full automatic
Air Flow	: Fan controlled
Temperature Isolation	: PU isolation
Voltage	: 220-240 V/50-60 Hz

Article Codes	L (mm)	W (mm)	H (mm)	Explanation
