MAKE YOUR OWN MAGIC

GEL-CHALLENGER 12 CLAY

Make the most of your next match with the women's GEL-CHALLENGER™ 12 CLAY tennis shoe. This lightweight and durable shoe has been designed with your comfort and endurance in mind when you play on clay courts.

Crafted with stability in mind, this shoe includes SOLYTE™ material that runs throughout the midsole and a mix of cushioning technologies that help protect and propel you at every point of your match.

An abstract graphic design featuring a woman's profile on the left, partially obscured by a large, stylized letter 'A'. The 'A' is composed of two overlapping shapes: a yellow one with a white dotted pattern and a solid dark blue one. The background is split diagonally from the bottom right, with a yellow upper half and a dark blue lower half. The word 'APPAREL' is written vertically in white, bold, sans-serif capital letters along the right edge.

COURT FF™ NOVAK

TECHNOLOGIES GLOSSARY

AHAR™ AHARPLUS™	AHAR™ and AHARPLUS™ are outer sole materials with excellent abrasion resistance, and also come in sponge type with good cushioning. They improve the durability of shoes while maintaining necessary functions including grip.
DYNAWALL™	DYNAWALL™ technology, offers midfoot stability during lateral movements and coast-to-coast coverage.
DYNAWRAP™	Placed in the eyelet and instep area, the Dynamic Wrap system is designed to hold the feet maximizing support and fit.
EVA	The EVA material makes the shoe especially lightweight while providing high comfort levels throughout the movement cycle.
FLEXION FIT™	The Flexion Fit toebox makes use of multiple inserts to increase flexibility, stability and safety while making the shoe more durable when exposed to extreme loads.
FLYTEFOAM™	The Flytefoam midsole material is made with cellulose microfibers added to the foam. It is the lightest midsole material we have ever made, which provides exceptional lightness, cushioning and durability.
GEL™	The ASICS GEL™ shock absorption protects your body from the impact generated with each step, contributing to reduce muscles fatigue. Made from fatigue-proof silicone material, ASICS GEL™ cushions can be found under the heel, the big toe joint and the ball area, mainly in the areas of highest vertical load at the time of impact and push-off.
MONO-SOCK™	Creating the entire upper in the form of a one-piece Monosock safeguards a more personal fit and makes the shoe more comfortable to wear.
ORTHOLITE™	This insole made from highly responsive OrthoLite with lasting rebound properties guarantees optimal positioning of the runner's foot.
PGUARD™	P-Guard it is a reinforcement piece which could be made by different materials. It is placed in the medial area of the shoe. Its strategic placement is designed for reinforcing the areas in which the shoe could wear out more due to the friction with the surface while playing.
SOLYTE™	A lighter weight midsole material than Asics traditional EVA and SpEVA. Also features enhanced cushioning and durability.
TRUSSTIC™	The TRUSSTIC™ technology supports stable movements by reinforcing the middle part of the sole and preventing the shoe from twisting.
TWISTRUSS™	A new TRUSSTIC system for tennis and indoor shoes with two parallel grooves that support undisturbed side and forward movements. It also enhances foot stability, so wearers have a firmer hold and can get the most out of their shoe's grip.
