PICKING THE RIGHT WINDSHIELD

The 13.7 In. Flare Windshield will give your bike a style boost while the 11.3 In. Windscreen will give your Chieftain a more low-profile look. For riders looking for wind protection, a windshield that stops shortly below eye level will prevent you from looking through bug splatter, while directing air over your head. For touring riders, we recommend the 21 In. Touring Windshield.

PROTECTION

11 IN. LOW WINDSHIELD

PICKING THE RIGHT WINDSHIELD

The 11 In. Curved Windshield will give your bike a style boost while the 11 In. Low Windscreen will give your bike a more low-profile look. For riders looking for wind protection, a windshield that stops shortly below eye

level will prevent you from looking through bug splatter, while directing air over your head. For touring riders, we recommend the 19 In. Tall Windshield.

BATTERIES

To ensure a battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a NOCO® Battery Charger (see P. 140). Be sure to check for corrosion from the terminals to the ends of the cables.

SPARK PLUGS

New spark plugs, engineered specifically for your Indian Motorcycle, ensure quick starts, fuel efficiency and peak performance.

BRAKE PADS

Maintaining and/or replacing brakes is critical to the safety and functionality of a motorcycle. Brake pads should be checked for wear and oil or grease (petroleum products) contamination. Brake discs should be checked for cracks, excessive corrosion or warping.

TIRES

Inspecting and replacing tires when needed is critical to the safety and functionality of a motorcycle.

OIL FILTER

Change oil filters with every oil change to provide the best engine protection and keep the engine operating at peak performance.

AIR FILTER

A clogged air filter can restrict air flow to the engine leading to reduced engine performance, engine life or catastrophic failure.
